

Questions and Answers

“Reimagining Dalyans of Istanbul”

All the submitted questions were in Turkish and therefore were answered in Turkish. Answers to frequently asked questions are summarized below.

Questions about Eligibility Requirements

- The competition is an architectural student competition open to all architecture undergraduate students studying in Turkey.
- Participants must be able to provide an official document to verify their student status by the date of the competition announcement.
- There is no restriction on the number of team members when participating as a team. Each team member must meet the eligibility requirements.

Questions about the Programme:

- There is no restriction on the size of the project.
- The architectural programme can be interpreted by the participants, including the structure and its position between land and sea.
- The site selection from the given project sites is left to the participants.

Questions about Design Criteria:

- The competition is a design competition where the idea is prioritized. Innovative design approaches and methods with future projections are encouraged. The design's feasibility will be evaluated through its overall intellectual approach.
- The design of the connection between land and sea are left to participants' interpretation of the programme.
- The pdf file attached to the competition brief is for information purposes and shows potential project sites and does not serve as basis of design drawings.
